Plastub

SLEEVINGS,
TUBES & PROFILES

Plastub

Since 1983, PLASTUB has acquired expertise in the manufacture of sleevings, tubes, bundled tubing and profiles in flexible plastics, silicone elastomers and other special materials.

PLASTUB proposes a wide range of high-performance products covering a vast array of applications in highly diverse industries, such as household appliances, cabling, paramedical, agriculture, cars and industrial vehicles, petrochemicals, cosmetics, pharmaceuticals, railway construction, chemistry, electromechanics, electro-thermal engineering etc. Varnished, impregnated and treated braided insulating sleevings, fire-retardant sleevings and diverse industrial braids extend the range even further.

omerin

PLASTUB is part of the OMERIN Group.

Men and women at your service

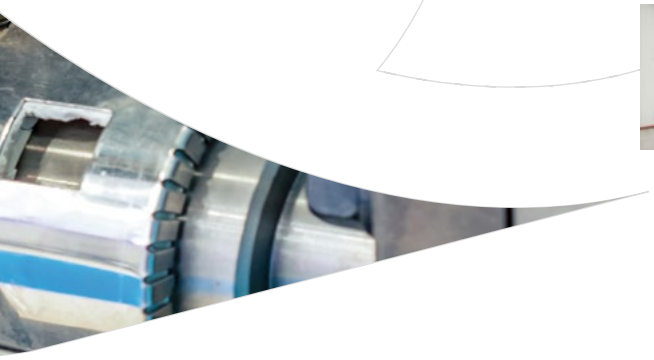
The technical expertise of our teams is at your disposal, providing responses and solutions to all your requirements.

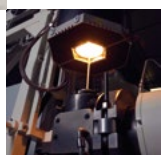
Our Methods, Quality and Research and Development Departments work permanently together with the aim of constantly improving our products and processes.

All our staff subscribe to this approach with their involvement and constant self-checking at all stages of production.

This catalogue is the result of the passionate endeavours of an entire team, who have displayed great talent in writing it for you. It is designed to be a simple and concise working tool for you, serving as a reference document that is able to meet the majority of your needs.

For further information about our products and their applications, project designs or non-binding quotations, simply contact our sales department at +33 **(0)473 824 436** or by e-mail to **plastub@omerin.com**





Plastub

Technical expertise

All our products are designed and developed in our engineering office and lab, through the technical expertise of our engineers.

We use test equipment to validate the physical, chemical, mechanical, electrical and fire-retardant behaviours of the sleevings, tubes and profiles that we manufacture.

Our products are subject to a vast array of tests to guarantee a high level of quality and satisfy the most stringent standards.

ALL THE TRADEMARKS LISTED BELOW ARE TRADEMARKS REGISTERED OR USED BY PLASTUB S.A.S.

PLASTUB®	Thermoplastic extruded sleevings and tubes
ELASTUB®	Special polymer extruded sleevings and tubes
SILITUBE®	Silicone elastomer extruded sleevings and tubes, with or without reinforcing braid
STARFLEX®	Thermoplastic or special polymer extruded tubes with textile, galvanised or stainless steel reinforcing braid.
TUBOL®	Copper, aluminium, thermoplastic or special polymer tubes, with thermoplastic sheaths, with or without reinforcing braid, for compressed air delivery.
BITUBE®	Two parallel tubes assembled with outer sheath for compressed air delivery.
MULTITUBE®	Assembly and outer sheath of tube-rods for compressed air delivery.
MULTI-VX®	Specific assembly concept and design of different tube, electrical cable elements etc.
SILIGAINE®	Braided fibreglass or textile thread sleevings, with or without coating.
PLASCORD®	Thermoplastic or special polymer extruded rods and cords.
PLASFORM®	Thermoplastic or special polymer extruded profiles.
SILFORM®	Silicone elastomer extruded rods and profiles.

PLASTUB® PVC120

PVC tube 50 Shore A
Food grade translucent

Description
Polyvinyl chloride extruded tube

Applications
Unpressurised transport of air, fluids

Fields
Various industries, agriculture, laboratories, paramedical, oxygen therapy etc.

General characteristics
- Extra flexible, economic, versatile
- Good resistance to acids, bases and detergents
- Recyclable

Technical data
- Standard: Material suitable for food contact under certain conditions
- Temperature of use: -30 to +50°C
- Nominal hardness: **50 Shore A** as per ISO R 868
- Nominal density: 1.14 as per ISO 1183
- Tensile strength: >10 Mpa as per ISO R 527
- Elongation at break: >360 % as per ISO R 527
- Standard colour: translucent
- Recommended connection: nipple with lug clamp or band clamp

Options *(contact us)*
- Other diameters
- Other solid colours
- Cut to lengths
- Other packaging
- Surface marking
- Additives: Anti-UV, antibacterial etc.
- Pre-cut rolls
- Pre-split versions

PLASTUB® PVC21

PVC tube 67 Shore A
Food grade translucent

PHTHALATE FREE

Description
Polyvinyl chloride extruded tube

Applications
Unpressurised transport of air, fluids

Fields
Various industries, agriculture, laboratories, oxygen therapy etc.

General characteristics
- Extra flexible, economic, versatile
- Good resistance to acids, bases and detergents
- Recyclable
- Phtalate-free

Technical data
- Standard: Material suitable for food contact under certain conditions
- Temperature of use: -30 to +50°C
- Nominal hardness: **67 Shore A** as per ISO R 868
- Nominal density: 1.20 as per ISO 1183
- Tensile strength: >12 Mpa as per ISO R 527
- Elongation at break: >250 % as per ISO R 527
- Standard colour: translucent
- Recommended connection: nipple with lug clamp or band clamp

Options *(contact us)*
- Other diameters
- Other solid colours
- Cut to lengths
- Other packaging
- Surface marking
- Additives: Anti-UV, antibacterial etc.
- Pre-cut rolls
- Pre-split versions

PLASTUB® PVC23

PVC tube 79 Shore A
Food grade crystal

PHTHALATE FREE

Description
Polyvinyl chloride extruded tube

Applications
Unpressurised transport of air, fluids

Fields
Various industries, agriculture, laboratories, aquariums etc.

General characteristics
- Flexible, economic, versatile
- Wide range of colours
- Good resistance to acids, bases and detergents
- Recyclable
- Phtalate-free

Technical data
- Tube approved for food contact as per the specifications of standard NF EN 1186 as well as European regulations 1935/2004 and 10/2011.
- Temperature of use: -30 to +50°C
- Nominal hardness: **79 Shore A** as per ISO R 868
- Nominal density: 1.24 as per ISO 1183
- Tensile strength: >17 Mpa as per ISO R 527
- Elongation at break: >280 % as per ISO R 527
- Standard colour: crystal
- Recommended connection: nipple with lug clamp or band clamp

Options *(contact us)*

PLASTUB® PVC29

PVC tube 68 Shore A Food grade crystal

Description
Polyvinyl chloride extruded tube

Applications
Unpressurised transport of air, fluids

Fields
Various industries, agriculture, laboratories, aquariums etc.

General characteristics
- Flexible, economic, versatile
- Wide range of colours
- Good resistance to acids, bases and detergents
- Recyclable

Technical data
- Standard: Material suitable for food contact under certain conditions
- Temperature of use: -30 to +50°C
- Nominal hardness: **68 Shore A** as per ISO R 868
- Nominal density: 1.20 as per ISO 1183
- Tensile strength: >17 Mpa as per ISO R 527
- Elongation at break: >280 % as per ISO R 527
- Standard colour: crystal
- Recommended connection: nipple with lug clamp or band clamp

Options *(contact us)*
- Other diameters
- Other solid colours
- Cut to lengths
- Other packaging
- Surface marking
- Additives: Anti-UV, antibacterial etc.
- Pre-cut rolls

PLASTUB® PVC30

PVC tube 67 Shore A Food grade translucent

PHTHALATE FREE

Description
Polyvinyl chloride extruded tube

Applications
Transport of milk and food liquids

Fields
Agriculture, milking machine

General characteristics
• Flexible, economic, versatile
• Good resistance to acids, bases and detergents
• Recyclable
• Phtalate-free
• Sterilisation: EtO
Gamma and beta radiation up to 25kGy

Technical data
• Tube approved for food contact as per the specifications of standard NF EN 1186 as well as European regulations 1935/2004 and 10/2011.
• Temperature of use: -30 to +50°C
• Nominal hardness: **67 Shore A** as per ISO R 868
• Nominal density: 1.19 as per ISO 1183
• Tensile strength: >16 Mpa as per ISO R 527
• Elongation at break: >400 % as per ISO R 527
• Standard colour: translucent
• Recommended connection: nipple with lug clamp or band clamp

Options *(contact us)*
• Other diameters
• Other solid colours
• Cut to lengths
• Other packaging
• Surface marking
• Additives: Anti-UV, antibacterial etc.
• Pre-cut rolls
• Pre-split versions
• Braided versions

The information given in this technical data sheet is indicative and subject to change without prior notice. As the conditions of use and the environment in which the product is used cannot be fully covered in our design work, PLASTUB shall not assume liability for any incidents in the event of inappropriate use and/or not carried out according to best practices and applicable standards.
To ensure optimal use of our products, we recommend full tests in real-life situations.
To this end, our sales department is on hand to supply samples and/or to examine the conditions of comprehensive testing in our laboratories.

PLASTUB® PVC33

PVC tube 70 Shore A Opaque

Description
Polyvinyl chloride extruded tube

Applications
Unpressurised transport of fluids
Disposable media

Fields
Miscellaneous industries, irrigation etc.

General characteristics
• Economic, good weather resistance
• Recyclable

Technical data
• Temperature of use: -30 to +50°C
• Nominal hardness: **70 Shore A** as per ISO R 868
• Nominal density: 1.46 as per ISO 1183
• Tensile strength: >11 Mpa as per ISO R 527
• Elongation at break: >250 % as per ISO R 527
• Standard colour: opaque
• Recommended connection: nipple with lug clamp or band clamp

Options *(contact us)*
• Other diameters
• Other solid colours
• Cut to lengths
• Other packaging
• Surface marking
• Additives: Anti-UV, antibacterial etc.
• Pre-cut rolls

PLASTUB® PVC42

PVC/NBR tube 74 Shore A Black

Description

Polyvinyl chloride and nitrile rubber extruded tube

Applications

Unpressurised transport of air, fluids

Fields

Unpressurised transfer and backflow of certain hydrocarbons

General characteristics

- Good weather resistance, improved resistance to hydrocarbons
- Recyclable

Technical data

- Temperature of use: -30 to +50°C
- Nominal hardness: **74 Shore A** as per ISO R 868
- Nominal density: 1.29 as per ISO 1183
- Tensile strength: >15 Mpa as per ISO R 527
- Elongation at break: >320 % as per ISO R 527
- Standard colour: black
- Recommended connection: nipple with lug clamp or band clamp

Options *(contact us)*

- Other diameters
- Cut to lengths
- Other packaging
- Surface marking
- Additives: Anti-UV, antibacterial etc.
- Pre-cut rolls

Standard tolerances: refer to pages 115 to 118.

Description
Polyvinyl chloride extruded bulb tube with variable diameter

Applications
Unpressurised transport of air, fluids

Fields
Oxygen therapy, laboratory

General characteristics
- Flexible, economic, versatile
- Used to connect two elements with different cross sections
- Good resistance to acids, bases and detergents
- Recyclable

Technical data
- Standard: Material suitable for food contact under certain conditions
- Standard interval: 1 m
- Temperature of use: -30°C to +50°C
- Nominal hardness: **68 Shore A** as per ISO R 868
- Nominal density: 1.20 as per ISO 1183
- Tensile strength: >17 Mpa as per ISO R 527
- Elongation at break: >280 % as per ISO R 527
- Standard colour: crystal
- Recommended connection: nipple with lug clamp or band clamp

Options *(contact us)*
- Other diameters
- Other solid colours
- Other packaging
- Surface marking
- Additives: Anti-UV, antibacterial etc.

PLASTUB® CPU

CPU tube 55 Shore D / 80°C Blue

Description

Polyurethane copolymer extruded and calibrated tube

Applications

Pressurised transport of compressed air, gas, lubricant

Fields

Maintenance, control, process, instrumentation

General characteristics

- Calibrated tube
- Alternative to PA and PU
- Small bending radius
- Good UV resistance
- Good hydrocarbon resistance

Technical data

- Temperature of use: -40 to +80°C
- Nominal hardness: **55 Shore D**
- Nominal density: 1,15
- Standard colour: blue
- Peak temperature: +100°C
- Recommended connection: quick-fit connector

Options *(contact us)*

- Other diameters
- Other solid colours
- Cut to lengths
- Other packaging
- Sheathed versions

Description
Polyester-base polyurethane extruded and calibrated tube

Applications
Pressurised transport of compressed air, gas, lubricant

Fields
Maintenance, control, process, instrumentation

General characteristics
- Good resistance to abrasion.
- Calibrated tube
- Small bending radius
- Good UV resistance
- Good hydrocarbon resistance

Technical data
- Temperature of use: **-30°C to +60°C**
- Nominal hardness: **98 Shore A** as per DIN 53505
- Nominal density: 1.22 as per DIN 53479
- Tensile strength: >50 Mpa as per DIN 53504 S2
- Elongation at break: >550 % as per DIN 53504
- Standard colour: translucent
- Peak temperature: **+80°C**
- Recommended connection: quick-fit connector

Options *(contact us)*

PLASTUB® PA

PA tube 62 Shore D / 100°C Translucent

Description
Polyamide extruded and calibrated tube

Applications
Pressurised transport of compressed air, lubricant

Fields
Maintenance, control, process, instrumentation

General characteristics
- Calibrated tube
- Good impact resistance
- Good alternate bending strength.
- Good UV resistance
- Good hydrocarbon resistance

Technical data
- Standard: Tube approved as per DIN 74324-1 and DIN 73378
- Temperature of use: **-40 to +100°C**
- Nominal hardness: **62 Shore D** as per ISO R 868
- Nominal density: 1.02 as per ISO 1183
- Tensile strength: >20 Mpa as per ISO R 527
- Elongation at break: >200 % as per ISO R 527
- Standard colour: translucent
- Peak temperature: **+120°C**
- Recommended connection: quick-fit connector

Options *(contact us)*
- Other diameters
- Other solid colours
- Cut to lengths
- Other packaging
- Sheathed versions
- Braided versions

PLASTUB® PA ATEX

PA tube 63 Shore D / 100°C Opaque

Description
Antistatic polyamide extruded and calibrated tube

Applications
Pressurised transport of compressed air, lubricant in ATEX environment

Fields
Maintenance, control, process, instrumentation, petrochemicals

General characteristics
- Calibrated tube
- Antistatic tube
- Good UV resistance
- Good hydrocarbon resistance

Technical data
- Standard: ATEX Sector II G/D
- Surface resistivity: 10^6 Ω as per IEC 62631
- Temperature of use: **-40 to +100°C**
- Nominal hardness: **63 Shore D** as per ISO R 868
- Nominal density: 1.25 as per ISO 1183
- Tensile strength: >16 Mpa as per ISO R 527
- Elongation at break: >300 % as per ISO R 527
- Standard colour: opaque
- Peak temperature: **+120°C**
- Recommended connection: quick-fit connector

Options *(contact us)*

PLASTUB® PAR

PA tube 72 Shore D / 100°C Translucent

Description
Rigid polyamide extruded and calibrated tube

Applications
Pressurised transport of compressed air, lubricants
Spraying, greasing

Fields
Maintenance, control, process, instrumentation

General characteristics
- Calibrated tube
- Improved resistance to pressure

Technical data
- Standard: DIN 73378
- Temperature of use: **-40 to +100°C**
- Nominal hardness: **72 Shore D** as per ISO R 868
- Nominal density: 1.03 as per ISO 1183
- Tensile strength: >52 Mpa as per ISO R 527
- Elongation at break: >200 % as per ISO R 527
- Standard colour: translucent
- Peak temperature: **+120°C**
- Recommended connection: quick-fit connector

Options *(contact us)*
- Other diameters
- Other solid colours
- Other packaging
- Sheathed versions

Nominal internal diameter (mm)	Nominal outside diameter (mm)	Bending radius* (mm)	Operating pressure* (bar)	Burst pressure* (bar)	Nominal linear weight (g/m)	Standard packaging Roll (m)
3	6	50	89	267	22	100

PLASTUB® PEBD

LDPE tube 49 Shore D
Food grade translucent

FDA* REGISTERED

PHTHALATE FREE

Description
Low-density polyethylene extruded tube

Applications
Pressurised transport of compressed air, chemical products, gas, lubricant

Fields
Maintenance, control, process, instrumentation

General characteristics
- Lightweight
- Small bend radius
- Physiologically inert
- Food grade
- Very good chemical resistance

Technical data
- Standard: * FDA-approved material: 21 CFR 177.1520, European regulations 1935/2004, 10/2011 and 2023/2006
- Temperature of use: -15 to +50°C
- Nominal hardness: **49 Shore D** as per ISO R 868
- Nominal density: 0.92 as per ISO 1183
- Tensile strength: >12 Mpa as per ISO R 527
- Elongation at break: >500 % as per ISO R 527
- Standard colour: translucent
- Recommended connection: compression tube fittings

Options *(contact us)*
- Other diameters
- Other solid colours
- Cut to lengths
- Other packaging
- Surface marking
- Sheathed versions

PLASTUB® PEHD

HDPE tube 65 Shore D
Food grade translucent

PHTHALATE FREE

Description
High-density polyethylene extruded tube

Applications
Pressurised transport of compressed air, chemical products, gas, lubricant

Fields
Maintenance, control, process, instrumentation

General characteristics
- Lightweight
- Physiologically inert
- Food grade
- Very good chemical resistance

Technical data
- Standard: Material suitable for food contact under certain conditions
- Temperature of use: -15 to +50°C
- Nominal hardness: **65 Shore D** as per ISO R 868
- Nominal density: 0.96 as per ISO 1183
- Tensile strength: >33 Mpa as per ISO R 527
- Elongation at break: >600 % as per ISO R 527
- Standard colour: translucent
- Recommended connection: compression tube fittings

Options *(contact us)*
- Other diameters
- Other solid colours
- Cut to lengths
- Other packaging
- Surface marking
- Sheathed versions
- Braided versions
- Antistatic versions

ELASTUB® STA55

TPE tube 59 Shore A / 90°C
Food grade opaque

FDA* REGISTERED

Description
SANTOPRENE® type
polymer extruded tube

Applications
Peristaltic pumps, doser pumps

Fields
Medical, agriculture, laboratory, cosmetics

General characteristics
- Extra flexible
- Excellent resistance to dynamic fatigue, shearing and abrasion
- Low deformation under compression and traction
- Food grade
- Excellent weather resistance
- Very good chemical resistance

Technical data
- Standard: * FDA-approved material 21 CFR 177.2600, NSF STANDARD 51
- Temperature of use: **-40 to +90°C**
- Nominal hardness: **59 Shore A** as per ISO R 868
- Nominal density: 0.97 as per ISO R 527
- Tensile strength: >4.4 Mpa as per ISO 37
- Elongation at break: >600 % as per ISO 37
- Standard colour: opaque
- Peak temperature: **+110°C**
- Recommended connection: nipple with lug clamp or band clamp

Options *(contact us)*
- Other diameters
- Other solid colours
- Cut to lengths
- Other packaging

ELASTUB® STA64

TPE tube 69 Shore A / 90°C
Food grade opaque

FDA* REGISTERED

Description
SANTOPRENE® type polymer extruded tube

Applications
Peristaltic pumps, doser pumps

Fields
Medical, agriculture, laboratory, cosmetics

General characteristics
- Excellent resistance to dynamic fatigue, shearing and abrasion
- Low deformation under compression and traction
- Food grade
- Excellent weather resistance
- Very good chemical resistance

Technical data
- Standard: * FDA-approved material 21 CFR 177.2600, NSF STANDARD 51
- Tube approved for food contact as per the specifications of standard NF EN 1186, decree of 9/11/1994 as well as European regulations 1935/2004 and 10/2011.
- Temperature of use: **-40 to +90°C**
- Nominal hardness: **69 Shore A** as per ISO R 868
- Nominal density: 0.97 as per ISO R 527
- Tensile strength: >6.9 Mpa as per ISO 37
- Elongation at break: >400 % as per ISO 37
- Standard colour: opaque
- Peak temperature: **+110°C**
- Recommended connection: nipple with lug clamp or band clamp

Options *(contact us)*

ELASTUB® ST73

TPE tube 78 Shore A / 90°C Black

Description
SANTOPRENE® type polymer extruded tube

Applications
Unpressurised transport of air, fluids

Fields
Miscellaneous industries, automobile

General characteristics
- Excellent weather resistance
- Very good chemical resistance
- Characteristics similar to many vulcanised rubbers

Technical data
- Standard: Approved material UL94 HB thickness 1 mm FMV SS 302 (equiv. NF ISO 3795)
- Temperature of use: **-40 to +90°C**
- Nominal hardness: **78 Shore A** as per ISO R 868
- Nominal density: 0.98 as per ISO R 527
- Tensile strength: >8.3 Mpa as per ISO 37
- Elongation at break: >375 % as per ISO 37
- Standard colour: black
- Peak temperature: **+110°C**
- Recommended connection: nipple with lug clamp or band clamp

Options *(contact us)*
- Other diameters
- Other solid colours
- Cut to lengths
- Other packaging

ELASTUB® ST87

TPE tube 93 Shore A / 90°C Black

Description
SANTOPRENE® type polymer extruded tube

Applications
Unpressurised transport of air, fluids

Fields
Miscellaneous industries, automobile

General characteristics
- Semi-rigid
- Excellent weather resistance
- Very good chemical resistance
- Characteristics similar to many vulcanised rubbers

Technical data
- Standard: Approved material UL94 HB thickness 1 mm FMV SS 302 (equiv. NF ISO 3795)
- Temperature of use: **-40 to +90°C**
- Nominal hardness: **93 Shore A** as per ISO R 868
- Nominal density: 0.96 as per ISO R 527
- Tensile strength: >15.9 Mpa as per ISO 37
- Elongation at break: >530 % as per ISO 37
- Standard colour: black
- Peak temperature: **+110°C**
- Recommended connection: nipple with lug clamp or band clamp

Options *(contact us)*
- Other diameters
- Other solid colours
- Cut to lengths
- Other packaging
- Braided versions

ELASTUB® GTS

TPE tube 75 Shore A / 90°C Black

Description
Nitrile polymer extruded tube

Applications
Unpressurised transfer and backflow of hydrocarbons, oils, greases

Fields
Miscellaneous industries, automobile

General characteristics
- Very good hydrocarbon resistance
- Good weather resistance

Technical data
- Temperature of use: **-40 to +90°C**
- Nominal hardness: **75 Shore A** as per ISO R 868
- Nominal density: 1 as per ISO R 527
- Tensile strength: >6.2 Mpa as per ISO 37
- Elongation at break: >265 % as per ISO 37
- Standard colour: black
- Peak temperature: **+110°C**
- Recommended connection: nipple with lug clamp or band clamp

ELASTUB® PTFE

PTFE tube 60 Shore D / 250°C
Food grade translucent

FDA* REGISTERED

Description
Polytetrafluoroethylene extruded tube

Applications
Pressurised transport of chemically aggressive fluids, gas

Fields
Medical, pharmaceutical, agriculture, laboratory, cosmetics

General characteristics
- UV resistance
- Exceptional chemical resistance
- Anti-adhesive
- Food grade
- Temperature resistance
- Non-inflammable
- Fire resistance

Technical data
- Standard: * Approved material FDA 21 CFR 177 1550
- Temperature of use: **-200 to +250°C**
- Nominal hardness: **60 Shore D** as per ISO R 868
- Nominal density: 2.20 as per ISO R 527
- Tensile strength: ≥25 Mpa as per ISO R 527
- Elongation at break: >300 % as per ISO 37
- Flame resistance UL94 V0
- Standard colour: translucent
- Peak temperature: **+280°C**
- Recommended connection: compression tube fittings

Options *(contact us)*
- Other diameters
- Other solid colours
- Cut to lengths
- Other packaging
- Braided versions

ELASTUB® PFA

PFA tube 60 Shore D / 260°C
Food grade crystal

FDA* REGISTERED

Description
Perfluoroalkoxy extruded tube

Applications
Pressurised transport of chemically aggressive fluids

Fields
Medical, pharmaceutical, agriculture, laboratory, cosmetics

General characteristics
- Transparency
- Longevity
- UV resistance
- Exceptional chemical resistance
- Anti-adhesive
- Food grade
- Temperature resistance
- Non-inflammable

Technical data
- Standard: * Approved material FDA 21 CFR 177 1550
- Temperature of use: **-70 to +260°C**
- Nominal hardness: **60 Shore D** as per ISO R 868
- Nominal density: 2.15 as per ISO R 527
- Elongation at break: >300 % as per ISO 37
- Standard colour: crystal
- Peak temperature: **+290°C**
- Recommended connection: compression tube fittings

Options *(contact us)*

ELASTUB® FEP

FEP tube 55 Shore D / 200°C
Food grade crystal

FDA* REGISTERED

Description
Fluorinated ethylene propylene extruded tube

Applications
Pressurised transport of chemically aggressive fluids

Fields
Medical, pharmaceutical, agriculture, laboratory, cosmetics

General characteristics
• UV resistance
• Exceptional chemical resistance
• Anti-adhesive
• Food grade
• Temperature resistance
• Non-inflammable

Technical data
• Standard: * Approved material FDA 21 CFR 177 1550
• Temperature of use: **-70 to +200°C**
• Nominal hardness: **55 Shore D** as per ISO R 868
• Nominal density: 2.15 as per ISO R 527
• Elongation at break: >300 % as per ISO 37
• Standard colour: crystal
• Peak temperature: **+230°C**
• Recommended connection: compression tube fittings

Options *(contact us)*
• Other diameters
• Other solid colours
• Cut to lengths
• Other packaging
• Sheathed versions

SILITUBE® SI50

Silicone tube
50 Shore A / 180°C
Food grade translucent

FDA* REGISTERED

Description
Peroxide-cured silicone elastomer extruded tube

Applications
Unpressurised transport of food grade fluids, alcohols, acids
Peristaltic pumps, doser pumps

Fields
Medical, pharmaceutical, agriculture, laboratory, cosmetics

General characteristics
- Extra flexible and elastic
- Food grade
- Can be sterilised in autoclave
- Resistant to high temperatures
- Good resistance to aggressive fluids, alcohols and acids
- Excellent weather resistance, UV
- Water-repellent
- Chemically inert and biologically neutral
- Good resistance to dynamic fatigue
- Low deformation under compression and traction

Technical data
- Standard: * FDA-approved material: 21 CFR 177.2600, European regulation 1935/2004
- Temperature of use: **-60 to +180°C**
- Nominal hardness: **50 Shore A** as per DIN 53505
- Nominal density: 1.14 as per ISO 1183
- Tensile strength: >12 Mpa as per DIN 53504 S1
- Elongation at break: >700 % as per DIN 53504 S1
- Standard colour: translucent
- Peak temperature: **+200°C**
- Recommended connection: nipple with lug clamp or band clamp

SILICONE ELASTOMER EXTRUDED TUBES

SILITUBE® SI60

Silicone tube 60 Shore A / 180°C Food grade translucent

FDA* REGISTERED

Description
Peroxide-cured silicone elastomer extruded tube

Applications
Unpressurised transport of food grade fluids, alcohols, acids
Peristaltic pumps, doser pumps

Fields
Medical, pharmaceutical, agriculture, laboratory, agriculture, cosmetics

General characteristics
- Flexible and elastic
- Food grade
- Resistant to high temperatures
- Can be sterilised in autoclave
- Good resistance to aggressive fluids, alcohols and acids
- Excellent weather resistance, UV
- Water-repellent
- Chemically inert and biologically neutral
- Good resistance to dynamic fatigue
- Low deformation under compression and traction

Technical data
- Standard: * FDA-approved material: 21 CFR 177.2600, European regulation 1935/2004
- Tube approved for food contact as per the specifications of standard NF EN 1186, decree of 25/11/1992 as well as European regulations 1935/2004 and 10/2011.
- Temperature of use: **-60 to +180°C**
- Nominal hardness: **60 Shore A** as per DIN 53505
- Nominal density: 1.14 as per ISO 1183
- Tensile strength: >11.5 Mpa as per DIN 53504 S1
- Elongation at break: >400 % as per DIN 53504 S1
- Standard colour: translucent
- Peak temperature: **+200°C**
- Recommended connection: nipple with lug clamp or band clamp

SILICONE ELASTOMER EXTRUDED TUBES

SILITUBE® SITEC

Silicone tube 73 Shore A / 180°C Opaque

Description
Peroxide-cured silicone elastomer extruded tube

Applications
Unpressurised transport of acid fluids

Fields
Medical, pharmaceutical, agriculture, laboratory, cosmetics

General characteristics
- Non-adhesive
- Resistant to high temperatures
- Good resistance to aggressive fluids, alcohols and acids
- Excellent weather resistance
- Water-repellent

Technical data
- Temperature of use: **-60 to +180°C**
- Nominal hardness: **73 Shore A** as per DIN 53505
- Nominal density: 1.45 as per ISO 1183
- Tensile strength: >6.5 Mpa as per DIN 53504 S1
- Elongation at break: >150 % as per DIN 53504 S1
- Standard colour: opaque

SILICONE ELASTOMER EXTRUDED TUBES

SILITUBE® SI260

Silicone tube 60 Shore A / 180°C Food grade crystal Platinum-cured

FDA* REGISTERED

Description
Platinum-cured silicone elastomer extruded tube

Applications
Unpressurised transport of acid fluids

Fields
Medical, pharmaceutical, agriculture, laboratory, cosmetics

General characteristics
- Resistant to high temperatures
- Enhanced mechanical properties
- Highly transparent
- Good resistance to aggressive fluids, alcohols and acids
- Excellent weather resistance
- Water-repellent
- Chemically inert and biologically neutral
- Odourless

Technical data
- Standard: * FDA-approved material: 21 CFR 177.2600, European regulation 1935/2004, European pharmacopeia section 3.1/9
- Tube approved for food contact as per the specifications of standard NF EN 1186, decree of 25/11/1992 as well as European regulations 1935/2004 and 10/2011
- Temperature of use: **-60 to +180°C**
- Nominal hardness: **60 Shore A** as per ISO7619-1
- Nominal density: 1.18 as per ISO 2781
- Tensile strength: >10.5 Mpa as per ISO 37
- Elongation at break: >530 % as per ISO 37
- Tear resistance: 32kN/m as per ASTMD624B
- Standard colour: crystal
- Peak temperature: **+200°C**
- Recommended connection: nipple with lug clamp or band clamp

SILICONE ELASTOMER EXTRUDED TUBES, WITH REINFORCING BRAID

SILITUBE® SI70TPCC

Silicone tube 70 Shore A with textile braid - food grade

Description
Silicone elastomer extruded tube, peroxide-catalysed, polyester fibre braid, impregnated

Applications
Pressurised transport of food grade liquids, alcohols, acids, steam

Fields
Electrical appliances, medical, agriculture

General characteristics
- Very flexible
- Food grade tube
- Resistance to pressure
- Good resistance to aggressive fluids, steam, alcohols and acids
- Good resistance to dynamic fatigue

Technical data
- Standard: * FDA-approved material: 21 CFR 177.2600, European regulation 1935/2004, European pharmacopeia section 3.1.9
- Tube approved for food contact as per the specifications of standard NF EN 1186, decree of 25/11/1992 as well as European regulations 1935/2004 and 10/2011.
- Temperature of use: **-40 to +150°C**
- Recommended connection: nipple with lug clamp or band clamp

Options *(contact us)*
- Other diameters
- Cut to lengths
- Other packaging
- Other braids
- Other qualities of interior tubes

Nominal internal diameter (mm)	Diameter on braid (mm)	Bending radius* (mm)	Operating pressure* (bar)	Burst pressure* (bar)	Nominal linear weight (g/m)	Standard packaging Roll (m)

**Values provided for information purposes for an ambient temperature of 23°C.*

Variant

SILITUBE® SITST P
Silicone tube 70 ShA reinforced
USP class VI
(platinum-cured)

Description

Silicone elastomer extruded tube, with interior polyester fibre reinforcement

Applications

Pressurised transport of food grade liquids, alcohols, acids, steam

Fields

Electrical appliances, medical, agriculture

General characteristics

- Flexible
- Smooth external surface
- Food grade
- Resistance to pressure and temperature
- Good resistance to aggressive fluids, alcohols and acids

Technical data

- Standard: * FDA-approved material: 21 CFR 177.2600, European regulation 1935/2004, European pharmacopeia section 3.1.9

SILICONE ELASTOMER EXTRUDED TUBES, WITH REINFORCING BRAID

SILITUBE® SITIA

Silicone tube with stainless steel braid, food grade

Description
Silicone elastomer extruded tube, stainless steel wire braid

Applications
Pressurised transport of food grade liquids, alcohols, acids, steam

Fields
Electrical appliances, agriculture

General characteristics
- Flexible
- Food grade
- Resistance to pressure and temperature
- Good resistance to aggressive fluids, alcohols and acids

Technical data
- Standard: * FDA-approved material: 21 CFR 177.2600, European regulation 1935/2004, European pharmacopeia section 3.1.9
- Tube approved for food contact as per the specifications of decree of 25/11/1992 as well as European regulations 13935/2004 and 10/2011.
- Temperature of use: **-60 to +180°C**
- AISI 304 stainless steel braid
- Recommended connection: nipple with low-pressure crimping ferrule

Options *(contact us)*
- Other diameters
- Other packaging
- Sheathed versions
- Other braids
- Hoses fitted with crimped connectors
- Other qualities of interior tubes

SILICONE ELASTOMER EXTRUDED TUBES, WITH REINFORCING BRAID

SILITUBE® SITIG

Silicone tube with stainless steel braid

Description
Silicone elastomer extruded tube, stainless steel wire braid

Applications
Pressurised transport of chemically aggressive fluids

Fields
Miscellaneous industries, industrial vehicles

General characteristics
• Flexible
• Resistance to pressure and temperature
• Improved resistance to hydrocarbon vapours

Technical data
• Temperature of use: **-60 to +180°C**
• AISI 304 stainless steel braid
• Recommended connection: nipple with low-pressure crimping ferrule

Options *(contact us)*
• Other diameters
• Other packaging
• Sheathed versions
• Other braids
• Hoses fitted with crimped connectors
• Other qualities of interior tubes

25	33,2	140	17	51	550	25

Standard tolerances: refer to pages 115 to 118.
**Values provided for information purposes for an ambient temperature of 23°C.*

Description
Nitrile rubber extruded tube, galvanised steel wire braid

Applications
Pressurised transfer and backflow of hydrocarbons, gases, oils, greases

Fields
Miscellaneous industries, automobile, petrochemicals

General characteristics
- Very good resistance to hydrocarbons and gases
- Resistance to pressure

Technical data
- Temperature of use: **-20 to +90°C**
- Recommended connection: nipple with low-pressure crimping ferrule

Precautions for use
- Do not use in humid atmospheres
- Do not heat insulate

Options *(contact us)*
- Other diameters
- Other packaging
- Sheathed versions
- Other braids
- Hoses fitted with crimped connectors
- Other qualities of interior tubes

**Values provided for information purposes for an ambient temperature of 23°C.*

Description
EPDM rubber extruded tube, stainless steel wire braid

Applications
Pressurised transport of potable water

Fields
Miscellaneous industries, sanitary, agriculture

General characteristics
- Excellent resistance to corrosion and ageing
- Resistance to pressure

Technical data
- Standard: ACS, WRAS, CSTB
- Temperature of use: **-20 to +90°C**
- AISI 304 stainless steel braid
- Recommended connection: nipple with low-pressure crimping ferrule

THERMOPLASTIC OR SPECIAL POLYMER EXTRUDED TUBES WITH REINFORCING BRAID

STARFLEX® NPN

Reinforced nitrile rubber tube

Description
Nitrile rubber extruded tube, with interior polyester fibre reinforcement

Applications
Pressurised transfer and backflow of hydrocarbons, gases, oils, greases

Fields
Miscellaneous industries, automobile, petrochemicals

General characteristics
• Very good resistance to hydrocarbons and gases
• Smooth external surface
• Resistance to pressure

Technical data
• Standard: 1TE as per EN 854
• Temperature of use: **-40 to +70°C**
• Recommended connection: nipple with lug clamp or band clamp

Nominal internal diameter (mm)	Nominal outside diameter (mm)	Bending radius* (mm)	Operating pressure* (bar)	Burst pressure* (bar)	Nominal linear weight (g/m)	Standard packaging Roll (m)

THERMOPLASTIC OR SPECIAL POLYMER EXTRUDED TUBES WITH REINFORCING BRAID

STARFLEX® PEXI

PEX tube with stainless steel braid

Description
Cross-linked polyethylene extruded tube, stainless steel wire braid

Applications
Pressurised transport of potable water, compressed air

Fields
Miscellaneous industries, sanitary, agriculture

General characteristics
• Excellent resistance to corrosion and ageing
• Resistance to pressure

Technical data
• Standard: DVGW - KTW-A and GW - W 270, ACS, WRAS
• Temperature of use: **-20 to +90°C**
• AISI 304 stainless steel braid
• Recommended connection: nipple with low-pressure crimping ferrule

Options *(contact us)*
• Other diameters
• Other packaging
• Sheathed versions
• Other braids
• Hoses fitted with crimped connectors

THERMOPLASTIC OR SPECIAL POLYMER EXTRUDED TUBES WITH REINFORCING BRAID

STARFLEX® PTFEI

PTFE tube with stainless steel braid, food grade

FDA* REGISTERED

Description
Polytetrafluoroethylene extruded tube, stainless steel wire braid

Applications
Pressurised transport of chemically aggressive fluids, gas

Fields
Medical, pharmaceutical, agriculture, laboratory, cosmetics

General characteristics
- Exceptional chemical resistance
- Longevity
- Food grade
- Temperature resistance
- Very good resistance to pressure
- Steam cleaning possible

Technical data
- Standard: * Tube material FDA-approved 21 CFR 177 1550
- Temperature of use: **-200 to +250°C**
- AISI 304 stainless steel braid
- Recommended connection: nipple with high-pressure crimping ferrule

Options *(contact us)*

THERMOPLASTIC OR SPECIAL POLYMER EXTRUDED TUBES WITH REINFORCING BRAID AND SHEATH

TUBOL® STGP

TPE tube with galvanised braid , PVC sheath

Description
EPDM rubber extruded tube, galvanised steel wire braid, polyvinyl chloride sheath

Applications
Pressurised transport of compressed air

Fields
Maintenance, control, process, instrumentation

General characteristics
- Good resistance to oils and gases
- Very flexible
- Smooth external surface
- Resistance to pressure

Technical data
- Temperature of use: **-20 to +70°C**
- Galvanized steel braid
- Sheath: PLASTUB® GS crystal
- Recommended connection: nipple with lug clamp or band clamp

Options *(contact us)*
- Other diameters
- Other packaging
- Surface marking
- Other braids
- Hoses fitted with crimped connectors

Description
Polyvinyl chloride extruded tube, with interior polyester fibre reinforcement

Applications
Pressurised transport of air, fluids

Fields
Various industries, agriculture, laboratories, paramedical

General characteristics
- Economical
- Flexible
- Good resistance to acids, bases and detergents
- Smooth external surface
- Resistance to pressure

Technical data
- Standard: Material suitable for food contact under certain conditions
- Temperature of use: **-20 to +60°C**
- Standard colour: crystal
- Recommended connection: nipple with lug clamp or band clamp

THERMOPLASTIC OR SPECIAL POLYMER EXTRUDED TUBES WITH REINFORCING SHEATH

TUBOL® PAP

PA tube with PVC sheath

Description

Polyamide extruded and calibrated tube, polyvinyl chloride sheath

Applications

Pressurised transport of compressed air, lubricant

Fields

Maintenance, control, process, instrumentation

General characteristics

- Sparkproof sheath
- Calibrated internal tube
- Good resistance to impacts and abrasion
- Very good UV resistance

Technical data

- Standard: Internal tube approved as per DIN 74324-1 and DIN 73378
- Temperature of use: **-20°C to +90°C**
- Tube: PLASTUB® PA translucent or black
- Sheath: PLASTUB® GR black Non flame-propagating PVC type C2 as per NF C 32070
- Recommended connection: quick-fit connector

Options *(contact us)*

- Other diameters
- Other packaging
- Surface marking
- Other tube and/or sheath colours
- Other qualities of interior tubes
- Other qualities of external sheaths

THERMOPLASTIC OR SPECIAL POLYMER EXTRUDED TUBES WITH REINFORCING SHEATH

TUBOL® PA ATEX

PA ATEX® tube with PVC ESD sheath

Description

Antistatic polyamide extruded and calibrated tube, PVC semi-conductor sheath

Applications

Pressurised transport of compressed air, lubricant in ATEX environment

Fields

Maintenance, control, process, instrumentation, petrochemicals

General characteristics

- Calibrated antistatic internal tube
- Semi-conductor external sleeving
- Good resistance to impacts and abrasion
- Very good UV resistance

Technical data

- Standard :

Internal tube ATEX sector II G/D

- Surface resistivity : 10^6 Ω

As per IEC62631

External sheath ATEX Sector II G/D

- Surface resistivity : 10^3 Ω

•no electrostatic charge is transferred to the sheath TUBOL® PA ATEX can be used with equipment in groups IIA, IIB, IIC (gases) IIA, IIB, IIC (dusts))

According to IEC60079-0

Test report LCIE 22012602-800041 et 800042

WARNING These data are only valid if the electrical equipotentiality of the TUBOL® PA ATEX is realized.

- Temperature of use : **-20 à +80°C**
- Tube : PLASTUB® PA ATEX black
- Sheath PLASTUB® PVC ESD noir
- Recommanded connection : quick ft connector

Options *(contact us)*

- Other diameters
- Other packaging
- Surface marking
- Other qualities of interior tubes
- Other qualities of external sheaths

Nominal internal diameter (mm)	Nominal outside diameter (mm)	External diameter on sheath (mm)	Bending radius* (mm)	Operating pressure* (bar)	Burst pressure* (bar)	Nominal linear weight (g/m)

THERMOPLASTIC OR SPECIAL POLYMER EXTRUDED TUBES WITH REINFORCING SHEATH

TUBOL® PEP

HDPE tube with PVC sheath

Description

High density polyethylene extruded and calibrated tube, polyvinyl chloride sheath

Applications

Pressurised transport of compressed air, lubricant

Fields

Maintenance, control, process, instrumentation

General characteristics

- Sparkproof sheath
- Calibrated internal tube
- Good resistance to impacts and abrasion
- Very good UV resistance
- Very good chemical resistance

Technical data

- Standard: Material suitable for food contact under certain conditions
- Temperature of use: **-15°C to +50°C**
- Tube: PLASTUB® PEHD translucent or black
- Sheath: PLASTUB® GR black - Non flame-propagating PVC type C2 as per NF C 32070
- Recommended connection: quick-fit connector

Options *(contact us)*

- Other diameters
- Other packaging
- Surface marking
- Other tube and/or sheath colours
- Other qualities of interior tubes
- Other qualities of external sheaths

THERMOPLASTIC OR SPECIAL POLYMER EXTRUDED TUBES WITH REINFORCING SHEATH

TUBOL® PTFEP

PTFE tube with PVC sheath

FDA* REGISTERED

Description
Polytetrafluoroethylene extruded tube, polyvinyl chloride sheath

Applications
Pressurised transport of chemically aggressive fluids, gas

Fields
Medical, pharmaceutical, agriculture, laboratory, cosmetics

General characteristics
- Sparkproof sheath
- Good resistance to impacts and abrasion
- Very good UV resistance
- Excellent chemical resistance

Technical data
- Standard: * Tube material FDA-approved 21 CFR 177 1550
- Temperature of use: **-20 to +90°C**
- Tube: ELASTUB® PTFE translucent
- Sheath: PLASTUB® GR black - Non flame-propagating PVC type C2 as per NF C 32070
- Recommended connection: compression tube fittings

Options *(contact us)*
- Other diameters
- Other packaging
- Surface marking

COPPER TUBES WITH REINFORCING SHEATH

TUBOL® CRP

Copper tube with PVC sheath

Description
Annealed copper tube, polyvinyl chloride sheath

Applications
Pressurised transport of compressed air, lubricant

Fields
Maintenance, control, process, instrumentation

General characteristics
- Very good resistance to pressure
- External mechanical and chemical resistance

Technical data
- Standard: Cu – B1 as per NF EN 12735-2
- Annealed, dust-free, dehydrated, weldless
- Temperature of use: **-20°C to +90°C**
- Sheath: PLASTUB® GR red - Non flame-propagating PVC type C2 as per NF C 32070
- Recommended connection: bicone ring connector

Options *(contact us)*
- Other sheath colours
- Other qualities of external sheaths

Nominal internal diameter (mm)	Nominal outside diameter (mm)	Diameter on PVC sheath (mm)	Bending radius* (mm)	Operating pressure* (bar)	Burst pressure* (bar)	Nominal linear weight (g/m)

COPPER TUBES WITH REINFORCING SHEATH

BITUBE® CRP

2 TUBOL® CRP with PVC sheath

Description
2 TUBOL® CRP, flat polyvinyl chloride sheath

Applications
Pressurised transport of compressed air, lubricant

Fields
Maintenance, control, process, instrumentation

General characteristics
• Very good resistance to pressure
• External mechanical and chemical resistance

Technical data
• Temperature of use: **-20°C to +90°C**
• Sheath: PLASTUB® GR black - Non flame-propagating PVC type C2 as per NF C 32070
• Recommended connection: bicone ring connector

Options *(contact us)*
• Other sheath colours
• Other qualities of external sheaths

Nominal internal diameter (mm)	Nominal outside diameter (mm)	Form of sheath	Thickness of sheath (mm)	Operating pressure* (bar)	Burst pressure* (bar)	Nominal linear weight (g/m)

FORMED ALUMINIUM FOIL TUBES WITH REINFORCING SHEATH

TUBOL® ALU

Aluminium tape with PE sheath

Description
Pre-formed aluminium tape with high-density polyethylene sheath

Applications
Pressurised transport of compressed air, lubricant

Fields
Maintenance, control, process, instrumentation

General characteristics
- Tool-free cold forming
- Small bending radius
- Good resistance to atmospheric conditions, hydrocarbons, lubricants and solvents

Technical data
- Temperature of use: **-40°C to +80°C**
- Sheath: PLASTUB® PEHD black
- Recommended connection: compression tube fittings

Options *(contact us)*
- Other diameters
- Surface marking

Nominal internal diameter (mm)	Nominal outside diameter (mm)	Bending radius* (mm)	Operating pressure* (bar)	Burst pressure* (bar)	Nominal linear weight (g/m)

BITUBE® PAP

2 PA tubes with PVC sheath

Description
Polyamide extruded and calibrated tube, flat polyvinyl chloride sheath

Applications
Pressurised transport of compressed air, lubricant

Fields
Maintenance, control, process, instrumentation

General characteristics
- Calibrated tubes
- Colour identification
- Sparkproof sheath
- Good resistance to impacts and abrasion
- Very good UV resistance

Technical data
- Standard: Internal tube approved as per DIN 74324-1 and DIN 73378
- Temperature of use: **-20°C to +90°C**
- Tubes: PLASTUB® PA translucent and black
- Sheath: PLASTUB® GR black - Non flame-propagating PVC type C2 as per NF C 32070
- Recommended connection: quick-fit connector

Options *(contact us)*
- Other diameters
- Other packaging
- Surface marking
- Other tube and/or sheath colours
- Other qualities of interior tubes
- Other qualities of external sheaths

Nominal internal diameter (mm)	Nominal outside diameter (mm)	Form of sheath	Thickness of sleeving (mm)	Bending radius* (mm)	Operating pressure* (bar)	Burst pressure* (bar)	Nominal linear weight (g/m)

BITUBE® PAP ROND

2 PA tubes assembled with PVC sheath

Description
Polyamide extruded and calibrated tubes, assembled, round polyvinyl chloride sheath

Applications
Pressurised transport of compressed air, lubricant

Fields
Maintenance, control, process, instrumentation

General characteristics
- Calibrated tubes
- Colour identification
- Good resistance to impacts and abrasion
- Very good UV resistance

Technical data
- Standard: Internal tubes approved as per DIN 74324-1 and DIN 73378
- Temperature of use: **-30° to +70°C**
- Tubes: PLASTUB® PA translucent and red
- Sheath: PLASTUB® PVC33 black
- Recommended connection: quick-fit connector

Options *(contact us)*
- Other diameters
- Other packaging
- Surface marking
- Other tube and/or sheath colours
- Other qualities of interior tubes
- Other qualities of external sheaths

Nominal internal diameter (mm)	Nominal outside diameter (mm)	External diameter on sheath (mm)	Bending radius* (mm)	Operating pressure* (bar)	Burst pressure* (bar)	Nominal linear weight (g/m)

**Values provided for information purposes for an ambient temperature of 23°C.*

Description
Rigid polyamide extruded and calibrated tubes, flat high density polyethylene sheath

Applications
Pressurised transport of compressed air, lubricants
Spraying, greasing

Fields
Maintenance, control, process, instrumentation, petrochemicals

General characteristics
- Good resistance to impacts and abrasion
- Very good UV resistance
- Very good chemical resistance
- Colour identification
- Improved pressure resistance

Technical data
- Standard: Internal tubes approved as per DIN 73378
- Temperature of use: -15°C to +50°C
- Tubes: PLASTUB® PAR black and red
- Sheath: PLASTUB® PEHD black
- Recommended connection: quick-fit connector

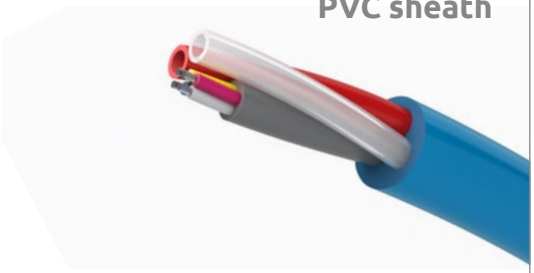
BITUBE® PA + Cable

2 PA tubes + cable assembled with PVC sheath



Description
Polyamide extruded and calibrated tubes + cable, assembled, round polyvinyl chloride sheath

Applications
Transport of compressed air and control signals

Fields
Maintenance, control, process, instrumentation

General characteristics
- Calibrated internal tubes
- Colour identification
- Spiral tube and cable assembly: optimised bending radius and flexibility
- Simplification and shorter cabling installation times
- Wide range
- Good UV resistance

Technical data
- Standard: Internal tubes approved as per DIN 74324-1 and DIN 73378
- Temperature of use: **-30 to +70°C**
- Tubes: PLASTUB® PA
- Sheath: PLASTUB® PVC33 black
- Recommended connection: electrical-pneumatic connector

Options *(contact us)*
- Other diameters
- Other packaging
- Surface marking
- Other tube and/or sheath colours
- Other cables
- Other qualities of interior tubes
- Other qualities of external sheaths

MULTITUBE® STD

PA tubes assembled with sheath

Description

Polyamide extruded and calibrated tubes, assembled, spiral form polyvinyl chloride sheath

Applications

Pressurised transport of compressed air, lubricant

Fields

Maintenance, control, process, instrumentation, industrial vehicles

General characteristics

- Calibrated internal tubes
- Colour identification
- Spiral tube assembly: optimised bending radius and flexibility
- Simplification and shorter cabling installation times
- Wide range
- Good UV resistance

Technical data

- Standard: Internal tubes approved as per DIN 74324-1 and DIN 73378
- Temperature of use: **-20°C to +70°C**
- Tubes: PLASTUB® PA - colours as per plan
- Sheath: PLASTUB® PVC33 black
- Recommended connection: pneumatic connector

Options *(contact us)*

- Other diameters
- Other packaging
- Surface marking
- Other tube and/or sheath colours
- Other qualities of interior tubes
- Other qualities of external sheaths

Number of tubes	Nominal internal diameter (mm)	Nominal outside diameter (mm)	Outside diameter on sheath (mm)	Thickness of sheath (mm)	Operating pressure* (bar)	Burst pressure (bar)	Bending radius* (mm)

MULTI-VX®

PRODUCTION EXAMPLES

SPEC 0082

12 PLASTUB® HDPE tubes Ø4x6 clear + 1 telecoms pair, assembled with PLASTUB® PVC33 black sheath, stainless steel braid, PLASTUB® PVC42 black sheath.

SPEC 0054

1 PLASTUB® PA tube Ø6x8 translucent + 1 ELASTUB® PFA tube Ø4x6 tube crystal + 1 ELASTUB® PFA tube Ø2x4 crystal, assembled, PLASTUB® GR grey spiral sheath.

SPEC 0083

2 PLASTUB® PA tubes Ø4x6 + 3 PLASTUB® PA tubes Ø2.7x4 + 1 PLASCORD® 33 rod Ø6, assembled with PLASTUB® PVC33 black round sheath.

Description

Specific assemblies of different elements: electric or traction cables, rods, reinforcing fibres, pre-split wire, optical fibre, shielding etc. External sheathing on demand

Applications

Transport of compressed air and control signals

Fields

Maintenance, control, process, instrumentation

General characteristics

- Spiral assembly of elements: optimised bending radius and flexibility
- Simplification and shorter cabling installation times

Technical data

- Specific requirements: contact us

THERMOPLASTIC EXTRUDED SLEEVINGS

PLASTUB® GS

PVC sleeving 84 Shore A 70°C, crystal

Description
Polyvinyl chloride extruded sleeving

Applications
Mechanical and electrical protection for cable harnesses

Fields
Industrial cabling, miscellaneous industries

General characteristics
- Very flexible
- Economical
- Recyclable

Technical data
- Standard: NF EN 60684-2
- Temperature of use: **-20°C to +70°C**
- Dielectric rigidity: 16 Kv/mm
- Nominal hardness: 84 Shore A as per ISO R 868
- Nominal density: 1.24 as per ISO 1183
- Tensile strength: >21 Mpa as per ISO R 527
- Elongation at break: >320 % as per ISO R 527
- Standard colour: crystal

Options *(contact us)*
- Other diameters
- Other solid colours
- Cut to lengths
- Other packaging
- Surface marking
- Additives: Anti-UV, antibacterial etc.
- Pre-split versions

THERMOPLASTIC EXTRUDED SLEEVINGS

PLASTUB® GR

PVC sleeving 89 Shore A 90°C, black

Description
Polyvinyl chloride extruded sleeving

Applications
Mechanical and electrical protection for cable harnesses

Fields
Automobile, industrial cabling

General characteristics
- Flexible
- Economical
- Anti-spark
- Recyclable

Technical data
- Standard: NF EN 60684-2
- Non flame-propagating PVC type C2 as per NF C 32070
- Temperature of use: **-20°C to +90°C**
- Dielectric rigidity: 16 Kv/mm
- Combustion speed: 0 m/min as per ISO 3795
- Nominal hardness: 89 Shore A as per ISO R 868
- Nominal density: 1.44 as per ISO 1183
- Tensile strength: >16 Mpa as per ISO R 527
- Elongation at break: >290 % as per ISO R 527
- Standard colour: black

Options *(contact us)*
- Other diameters
- Other solid colours
- Cut to lengths
- Other packaging
- Surface marking
- Additives: Anti UV
- Pre-split versions

THERMOPLASTIC EXTRUDED SLEEVINGS

PLASTUB® GHT

PVC sleeving 92 Shore A 105°C, black

Description
Polyvinyl chloride extruded sleeving

Applications
Mechanical protection and electrical insulation for cable harnesses

Fields
Automobile, industrial cabling

General characteristics
- Flexible
- Economical
- Recyclable
- Improved resistance to temperature

Technical data
- Standard: NF EN 60684-2
- Temperature of use: **-15°C to +105°C**
- Dielectric rigidity: 16 Kv/mm
- Nominal hardness: 92 Shore A as per ISO R 868
- Nominal density: 1.40 as per ISO 1183
- Tensile strength: >16 Mpa as per ISO R 527
- Elongation at break: >210 % as per ISO R 527
- Standard colour: black

Options *(contact us)*

THERMOPLASTIC EXTRUDED SLEEVINGS

PLASTUB® GHTC

PVC sleeving 78 Shore A 105°C, black

Description
Polyvinyl chloride extruded sleeving

Applications
Mechanical and electrical protection for cable harnesses

Fields
Automobile, industrial cabling

General characteristics
- Very flexible
- Economical
- Recyclable
- Improved resistance at low temperature

Technical data
- Standard: NF EN 60684-2
- Temperature of use: **-35°C to +105°C**
- Dielectric rigidity: 16 Kv/mm
- Nominal hardness: 78 Shore A as per ISO R 868
- Nominal density: 1.37 as per ISO 1183
- Tensile strength: >14 Mpa as per ISO R 527
- Elongation at break: >320 % as per ISO R 527
- Standard colour: black

SPECIAL POLYMER EXTRUDED SLEEVINGS

ELASTUB® GST73

TPE sleeving 78 Shore A 125°C, black

Description
SANTOPRENE® type polymer extruded sleeving

Applications
Mechanical and electrical protection for cable harnesses

Fields
Automobile, industrial cabling

General characteristics
- Resistant to high temperatures
- Excellent weather resistance
- Recyclable

Technical data
- Standard: Approved material UL94 HB thickness 1 mm FMV SS 302 (equiv. NF ISO 3795)
- Temperature of use: **-40°C to +125°C**
- Dielectric rigidity: 18 Kv/mm
- Nominal hardness: 78 Shore A as per ISO R 868
- Nominal density: 0.98 as per ISO 1183
- Tensile strength: >8.3 Mpa as per ISO 37
- Elongation at break: >375 % as per ISO 37
- Standard colour: black

Options *(contact us)*
- Other diameters
- Other solid colours
- Cut to lengths
- Other packaging
- Fire-retardant versions

SPECIAL POLYMER EXTRUDED SLEEVINGS

ELASTUB® GSTI70

TPE sleeving 75 Shore A 125°C, black, fire-retardant

Description
SANTOPRENE® type polymer extruded sleeving

Applications
Mechanical and electrical protection for cable harnesses

Fields
Automobile, industrial cabling

General characteristics
- Fire-retardant
- Resistant to high temperatures
- Excellent weather resistance
- Recyclable

Technical data
- Standard: Approved material UL94 V0 thickness ≥ 1.5 mm, UL94 V2 thickness 1 mm
- Oxygen index: 26 % as per ISO 45089-2
- Temperature of use: -40°C to +125°C
- Dielectric rigidity: 18 Kv/mm
- Nominal hardness: 75 Shore A as per ISO R 868
- Nominal density: 1.22 as per ISO 1183
- Tensile strength: >8.7 Mpa as per ISO 37
- Elongation at break: >520 % as per ISO 37
- Standard colour: black

Options *(contact us)*

SPECIAL POLYMER EXTRUDED SLEEVINGS

ELASTUB® THERMO POX

Polyolefin heat-shrink sleeving, 135°C, black

Description
Polyolefin extruded sleeving, irradiated

Applications
Mechanical and electrical protection for cable harnesses, identification

Fields
Automobile, industrial cabling, modelling

General characteristics
- Dimensionally adaptable
- Self-extinguishing

Technical data
- Standard: NF EN 60684-2, UL 224 VW-1
- Temperature of use: **-55°C to +135°C**
- Dielectric rigidity: 19 Kv/mm as per ASTM D2671
- Nominal density: 1.02 as per ASTM D792
- Tensile strength: >11 Mpa as per ASTM D638
- Elongation at break: >200 % as per ASTM D638
- Standard colour: black
- Shrinkage coefficient: 2/1
- Shrinkage temperature: **+90°C**

Options *(contact us)*
- Other diameters
- Other shrinkage coefficients
- Other solid colours
- Cut to lengths
- Other packaging
- Surface marking

Nominal internal diameter before shrinkage (mm)	Nominal internal diameter before shrinkage (inches)	Nominal internal diameter after shrinkage (mm)	Nominal thickness after shrinkage (mm)	Nominal linear weight (g/m)	Standard packaging Roll (m)
1,6	1/16	0,8	0,45	3	150

SILICONE ELASTOMER EXTRUDED SLEEVINGS

SILITUBE® GSI

Silicone sleeving 70 Shore A 230°C, translucent

Description
Silicone elastomer extruded sleeving

Applications
Mechanical and electrical protection for cable harnesses, identification

Fields
Automobile, industrial cabling

General characteristics
- Flexible and elastic
- Resistant to very high temperatures
- Dielectric strength
- Slow combustion
- Excellent weather resistance
- Water-repellent
- Halogen-free

Technical data
- Standard: NF EN 60684-2, IEC 60684-3-121 to 124
- Temperature of use: **-80°C to +230°C**
- Dielectric rigidity: 20 Kv/mm
- Nominal hardness: 70 Shore A as per DIN 53505
- Nominal density: 1.19 as per ISO 1183
- Tensile strength: >10 Mpa as per DIN 53504 S1
- Elongation at break: >400 % as per DIN 53504 S1
- Standard colour: translucent

Options *(contact us)*
- Other diameters
- Other solid colours
- Cut to lengths
- Other packaging

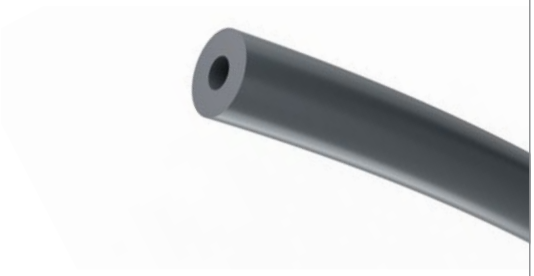
SILICONE ELASTOMER EXTRUDED SLEEVINGS

SILITUBE® GSI811

Silicon sleeving 68 Shore A 200°C, grey-blue



Description
Silicone elastomer extruded sleeving

Applications
Mechanical and electrical protection for cable harnesses

Fields
Rail industry

General characteristics
- Flexible and elastic
- Resistant to very high temperatures
- Dielectric strength
- Fire / smoke classification
- Excellent weather resistance
- Water-repellent and anti-adhesive

Technical data
- Standard: Blend approved I2-F1 as per NF F 16-101 and STM-S-001/C
- Oxygen index: 34,7 % as per ISO 45089-2
- Temperature of use: **-80°C to +200°C**
- Dielectric rigidity: 20 Kv/mm
- Nominal hardness: 68 Shore A as per DIN 53505
- Nominal density: 1.20 as per ISO 1183
- Tensile strength: >8 Mpa as per ISO 37
- Elongation at break: >350 % as per ISO 37
- Standard colour: grey-blue

Options *(contact us)*
- Other diameters
- Cut to lengths
- Other packaging

FIBREGLASS BRAIDED SLEEVING WITH SILICONE COATING

SILIGAINE® 15C3

Silicone fibreglass sleeving 250°C

Description
Fibreglass braided sleeving with silicone elastomer coating

Applications
Mechanical and electrical protection for cable harnesses

Fields
Automobile, electrical and electronic construction

General characteristics
- Flexible
- Resistant to very high temperatures
- Good flame resistance
- Self-extinguishing
- Excellent weather resistance
- Halogen-free

Technical data
- Standard: NF EN 60684-2, IEC 60684-3 part 401
- Temperature of use: **-60°C to +250°C**
- Dielectric rigidity: >3 Kv/mm
- Standard colour: brick red
- Peak temperature: **+300°C**

Options *(contact us)*
- Other solid colours
- Cut to lengths
- Other dielectric rigidities
- Other coatings

Nominal internal diameter (mm)	Nominal thickness (mm)	Nominal linear weight (g/m)	Standard packaging Roll (m)

FIBREGLASS BRAIDED SLEEVING WITH SILICONE COATING

SILITUBE® X

Fire-retardant mineral fibre sleeving with silicone coating 260°C

Description
Mineral fibre braided sleeving with silicone elastomer coating

Applications
Thermal protection and against incandescent projections

Fields
Glassworks, foundries, steel making etc.

General characteristics
- Flexible
- Resistant to very high temperatures
- Good resistance to flames and incandescent projections
- Fire-retardant
- Excellent weather resistance
- Asbestos-free

Technical data
- Standard: Inspired by American aeronautical standards SAE.AS1055 and AS1072, NF F 16-101, IEC 60695-2-10 and IEC 60695-2-11, UNI CEI 11170-3, NF EN 45545-2
- Temperature of use: **-60°C to +260°C**
- Standard colour: brick red
- Peak temperature: 30 min at **+800°C**, 15 min at **+1100°C**, 1 min at **+1500°C**

Options *(contact us)*
- Cut to lengths

Nominal internal diameter (mm)	Nominal internal diameter (inch)	Nominal thickness (mm)	Nominal linear weight (g/m)	Standard packaging
8	5/16"	4	120	on request
10	3/8"	4	140	on request
13	1/2"	4	200	on request
16	5/8"	4	220	on request
19	3/4"	4	240	on request
22	7/8"	4	260	on request
25	1"	4	290	on request
32	1" 1/4	4	380	on request
38	1" 1/2	4	440	on request
45	1" 3/4	4	490	on request
51	2"	4	540	on request
57	2" 1/4	4	600	on request
64	2" 1/2	4	680	on request
76	3"	4	880	on request
89	3" 1/2	4	960	on request
102	4"	4	1,170	on request

The flexibility and extra wall thickness of the SILITUBE® X negates the need to indicate tolerances on the internal diameter.

MONOFILAMENT BRAIDED SLEEVINGS, UNCOATED

SILIGAINE® TN

Polyester sleeving 150°C

Description
Monofilament polyester fibre braided sleeving

Applications
Mechanical protection for cable harnesses

Fields
Automobile, industrial cabling

General characteristics
• Expandable.
• Good resistance to abrasion and cuts
• Excellent resistance to humidity and mould

Technical data
• Standard: NF EN 60684-3 parts 340 to 342
• Temperature of use: **-50°C to +150°C**
• Peak temperature: **+175°C**

Options *(contact us)*
• Other solid colours
• Cut to lengths

Nominal internal diameter (mm)	Minimum internal diameter (mm)	Maximum internal diameter (mm)	Standard packaging Roll (m)
3	1	6	100
4	2	7	100
5	3	9	100
6	4	11	100
8	5	13	100
10	6	17	100
12	8	21	50
15	10	24	50

STAINLESS STEEL WIRE BRAIDED SLEEVINGS

METALTRESSE®

Metallic sleeving

Description
Stainless steel wire braided sleeving

Applications
Thermal protection and against incandescent projections, shielding

Fields
Glassworks, foundries, steel making, electrical industries

General characteristics
• Expandable.
• Excellent mechanical strength

Technical data
• Specific requirements: contact us

Options *(contact us)*
• Other diameters
• Other packaging
• Other braid qualities

Nominal internal diameter (mm)	Wire diameter (mm)	Nominal linear weight (mm)	Standard packaging
8 - 10	0,2	57	on request
10 - 12	0,2	69	on request
12 - 14	0,2	82	on request

PLASCORD® PVC23

PVC rod 79 Shore A Crystal

Description
Polyvinyl chloride extruded rod

Applications
Production of bolt ropes, leaktight seals

Fields
Tarpaulin, sail, canvas, blind manufacturers

General characteristics
- Very flexible
- Economical
- Recyclable

Technical data
- Temperature of use: -30°C to +70°C
- Nominal hardness: **79 Shore A** as per ISO R 868
- Nominal density: 1.24 as per ISO 1183
- Tensile strength: >17 Mpa as per ISO R 527
- Elongation at break: >280 % as per ISO R 527
- Standard colour: crystal

Options *(contact us)*
- Other diameters
- Other solid colours
- Cut to lengths
- Other packaging
- Surface marking
- Additives: Anti-UV, antibacterial etc.

PLASCORD® PVC33

PVC rod 70 Shore A Crystal

Description
Polyvinyl chloride extruded rod

Applications
Production of bolt ropes, leaktight seals

Fields
Tarpaulin, sail, canvas, blind manufacturers

General characteristics
- Very flexible
- Economical
- Recyclable

Technical data
- Temperature of use: -30°C to +70°C
- Nominal hardness: **70 Shore A** as per ISO R 868
- Nominal density: 1.46 as per ISO 1183
- Tensile strength: >11 Mpa as per ISO R 527
- Elongation at break: >250 % as per ISO R 527
- Standard colour: black

Options *(contact us)*
- Other diameters
- Other solid colours
- Cut to lengths
- Other packaging
- Surface marking
- Additives: Anti-UV, antibacterial etc.

PLASCORD® PEBD

LDPE rod 49 Shore D translucent

Description
Low-density polyethylene extruded rod

Applications
Production of blinds, saddlery

Fields
Tarpaulin, sail, canvas, blind manufacturers

General characteristics
- Low friction coefficient
- Economical
- Recyclable

Technical data
- Temperature of use: -30°C to +50°C
- Nominal hardness: **49 Shore D** as per ISO R 868
- Nominal density: 0.92 as per ISO 1183
- Tensile strength: >12 Mpa as per ISO R 527
- Elongation at break: >500 % as per ISO R 527

PLASCORD® PEHD

HDPE rod 65 Shore D translucent

Description
High density polyethylene extruded rod

Applications
Production of blinds, saddlery

Fields
Tarpaulin, sail, canvas, blind manufacturers

General characteristics
- Semi-rigid
- Low friction coefficient
- Economical
- Recyclable

Technical data
- Temperature of use: -30°C to +50°C
- Nominal hardness: **65 Shore D** as per ISO R 868
- Nominal density: 0.96 as per ISO 1183
- Tensile strength: >33 Mpa as per ISO R 527
- Elongation at break: >600 % as per ISO R 527
- Standard colour: translucent

PLASCORD® PVC33 REINFORCED

PVC rod 70 Shore A Reinforced

Description
Polyvinyl chloride extruded rod, with textile fibre or metal wire central reinforcement

Applications
Tow ropes, disposable media

Fields
Miscellaneous industries

General characteristics
- Very flexible
- Non-expandable
- Economical

Technical data
- Temperature of use: -30°C to +70°C
- Nominal hardness: **70 Shore A** as per ISO R 868
- Nominal density: 1.46 as per ISO 1183
- Standard colour: opaque

Options *(contact us)*
- Other diameters
- Other solid colours
- Other packaging
- Surface marking
- Additives: anti UV, anti-bacterial etc.

SILICONE ELASTOMER EXTRUDED RODS AND CORDS

SILFORM® ROD SI70

Silicone rod 70 Shore A 180 °C Food grade translucent

FDA* REGISTERED

Description
Silicone elastomer extruded rod

Applications
Leaktight seal

Fields
Miscellaneous industries

General characteristics
- Flexible and elastic
- Food grade
- Resistant to high temperatures
- Can be sterilised in autoclave
- Good resistance to aggressive fluids, alcohols and acids
- Excellent weather resistance
- Water-repellent and anti-adhesive
- Chemically inert and biologically neutral

Technical data
- Standard: * FDA-approved material: 21 CFR 177.2600, European regulation 1935/2004, European pharmacopeia section 3.1/9
- Temperature of use: **-60°C to +180°C**
- Nominal hardness: **70 Shore A** as per DIN 53505
- Nominal density: 1.19 as per ISO 1183
- Tensile strength: >10 Mpa as per DIN 53504 S1
- Elongation at break: >400 % as per DIN 53504 S1
- Standard colour: translucent
- Peak temperature: **+200°C**

Options *(contact us)*
- Other diameters
- Other solid colours
- Cut to lengths
- Other packaging
- Other hardness values

Description
Polyvinyl chloride, polypropylene or polyethylene extruded profiles

General characteristics
- Flexible, economic, versatile
- Wide range of colours
- Good resistance to acids, bases and detergents
- Recyclable

SPECIAL POLYMER PROFILES

TPE profiles

Description
EPDM polymer extruded profiles

General characteristics
- Excellent weather resistance
- Very good chemical resistance
- Characteristics similar to many vulcanised rubbers

SILFORM®

SILICONE ELASTOMER PROFILES

Silicone profiles

Description
Silicone elastomer extruded profiles

General characteristics
- Flexible and elastic
- Food grade
- Resistant to high temperatures
- Can be sterilised in autoclave
- Chemically inert and biologically neutral
- Good resistance to dynamic fatigue
- Water-repellent and anti-adhesive
- Excellent weather resistance
- Good resistance to aggressive fluids, alcohols and acids
- Low deformation under compression and traction

Tel. + 33 (0)4 73 82 44 36
e-mail: *plastub@omerin.com*
www.plastub.fr

SUPPLEMENTARY RANGE

THERMOPLASTIC COVERINGS

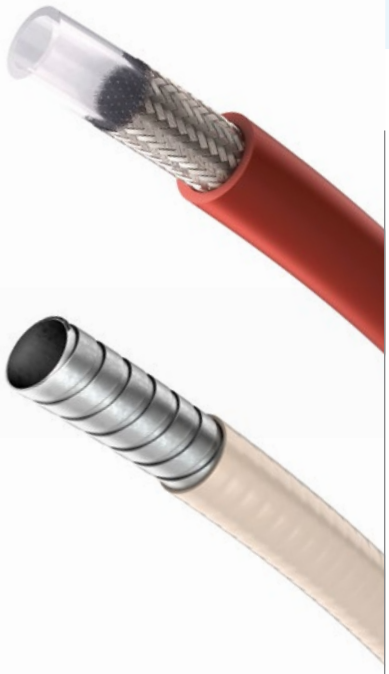
- Economic, versatile
- Wide range of colours for identification
- Ease of installation
- Vast mechanical properties depending on thermoplastics
- Good chemical resistance
- Good dielectric insulation

SPECIAL POLYMER COVERINGS

- Excellent weather resistance
- Very good chemical resistance
- Characteristics similar to many vulcanised rubbers

SILICONE ELASTOMER COVERINGS

- Flexible and elastic
- Resistant to high temperatures
- Good thermal insulation
- Very good dielectric insulation
- Excellent weather resistance
- Food grade
- Can be sterilised in autoclave
- Good chemical resistance
- Water-repellent and anti-adhesive
- Chemically inert and biologically neutral
- Good resistance to dynamic fatigue



THERMAL PROTECTION

Production example
Brick red silicone sleeving on PTFE hose

Applications
Anti-burn protection

AESTHETIC FINISH

Production example
White PVC sleeving on corrugated steel pipe

Applications
Make outer surface smooth for cleaning in medical environment

Plastub
Zone Industrielle 63600 AMBERT - France
Tel. + 33 (0)4 73 82 44 36
e-mail: *plastub@omerin.com*

IDENTIFICATION

Production example
Coloured PVC sheathing on R2V cable

Applications
Colour marking for specific identification

MECHANICAL PROTECTION

Production example
Polyurethane sheathing on stainless steel capillary tube

Applications
Anti-abrasion coating

ELECTRICAL INSULATION

Production example
Coloured PVC sheathing on bare copper braid

Applications
Electrical insulation

CHEMICAL PROTECTION

Production example
PVC sheathing on metal spring sleeving

Applications
Anti-corrosion protection in chlorinated ambient air

STEEL WIRE BRAIDS

- Galvanised steel or AISI stainless steel 304L wire
- Bare copper, tin-plated copper, nickel-plated copper, silver-plated copper

TEXTILE STRAND BRAIDS

- Polyamide, polyester, high-resistance polyester, aramid strands
- Glass / mineral fibres

THERMAL PROTECTION

Production example
Fibreglass braid

Applications
Tube protection against heat

SHIELDING

Production example
Tin-plated copper wire braid

Applications
Electrical shield / electromagnetic compatibility

MECHANICAL REINFORCEMENT

Production example
Meta-aramid or para-aramid fibre braid

Applications
Improved resistance to pressure, aeronautical wiring

IDENTIFICATION

Production example
Stainless steel wire braid with one or more coloured spiral tracers

Applications
Identification of fluid transported

CUTS TO LENGTH

- In-line: straight lengths, bulk pre-cuts
- Backwork: very precise tolerances on length and parallelism

ROLLS

- 25 m to 500 m rolls.
- On request, according to product: inflated rolls, welded, in bags etc.

SPOOLS/SPINDLES

- Plastic or cardboard spools, cardboard spindles, spools etc.

DRUMS

- Wood, plastic, plywood, circled, staved, IPPC drums etc.

Diameter	Effective load	Cheek thickness	Barrel diameter	Central hub diameter	Effective width	No-load weight
Lost drum Ø 600	60 kg	12 mm	240 mm	40 mm	300 mm	6 kg
Lost drum Ø 750	80 kg	12 mm	300 mm	80 mm	350 mm	9 kg
Lost drum Ø 900	200 kg	25 mm	420 mm	80 mm	440 mm	30 kg
Lost drum Ø 1200	200 kg	28 mm	630 mm	80 mm	600 mm	45 kg
Lost drum Ø 1650	300 kg	40 mm	930 mm	80 mm	600 mm	-

BOXES-PALLETS

- Different dimensions and thicknesses, IPPC, Galia etc.

SPECIFIC CONDITIONING

- Specific packaging, sealed or unsealed PE bags, custom labelling, barcodes, QR codes etc.

CALCULATION OF LINEAR WEIGHT OF BARE TUBE

*The linear weight of a tube or sleeving varies according to its diameter, its thickness and the constituent material.

$$M=[(\pi*D^2)/4 - (\pi*d^2)/4]*G$$

M: Linear weight
π: 3.14159265359
D: External tube diameter
d: Internal tube diameter
G: Material density

Equivalence in units of pressure

- Pressure in N/m² = Pressure in bar * 100,000
- Pressure in N/m² = Pressure in Psi * 6,894.8
- Pressure in Psi = Pressure in N/m² * 14,500
- Pressure in bar = Pressure in Psi * 0.0689
- Pressure in Kg/cm² = Pressure in bar * 0.9806

Conversion factors for metric and imperial units

TABLE OF CHEMICAL COMPATIBILITY

Indicative information, not contractually binding

A Very good
B Good
C Fairly good
D Not compatible
Compatibility unknown
1 Satisfactory at ambient temp.
2 Satisfactory up to 50°C
3 Satisfactory for O-ring seals

PLASTUB® GENERAL TERMS AND CONDITIONS OF SALE

Article 1 - Application of general terms and conditions of sale
These general terms and conditions of sale are systematically sent or delivered to each customer when a customer account is created, or recalled when a quotation is provided to enable the customer to place an order.
Consequently, placing an order implies full and unequivocal acceptance of these GENERAL TERMS AND CONDITIONS OF SALE to the exclusion of all other documents.
Unless otherwise formally accepted in writing by PLASTUB, no special conditions shall prevail over these GENERAL TERMS AND CONDITIONS OF SALE. Unless otherwise expressly accepted, no customer conditions to the contrary shall therefore be imposable on PLASTUB.
Should PLASTUB not impose the application of any of any of the GENERAL TERMS AND CONDITIONS OF SALE at any given moment, this may not be interpreted as its renouncement of imposing any such terms and conditions at a later time.
Our general terms and conditions of sale may be consulted on request.

Article 2 – Orders
To be correctly registered, all orders must be placed in writing or sent by fax or e-mail to the main PLASTUB correspondence address in AMBERT, Puy-de-Dôme, France.
Orders shall be confirmed by PLASTUB by acknowledgement of receipt in the form of a fax, e-mail or standard letter bearing an official PLASTUB signature.
The order and any amendments shall indicate the PLASTUB product references, the price proposal references, the price, delivery lead time, transport conditions and terms of payment, as well as the references of the documents concerning the product technical specifications, packaging, delivery location and where necessary the quality or technical documents requested to accompany the delivery.
All orders are considered to be firm and definitive on the date of transmission of the order acknowledgement issued by PLASTUB.

Article 3 – Order of modification
Any changes to the order by the customer shall be notified in writing and to be valid, must be covered by a new acknowledgement of receipt signed by PLASTUB and setting out the consequences in terms of price and lead time. Changes to the order may give rise to the definition of a new price proposal.
Any cancellation of an order shall give rise to payment of the services already delivered by PLASTUB.
Any modification of the order resulting from abnormal conditions of use or conditions not indicated in the specifications shall give rise to a new price proposal.

Article 4 – Delivery lead times
The dates indicated on the acknowledgement of receipt correspond to the dates of shipment.
The delivery lead times are indicated as precisely as possible but depend on the conditions of supply and transport affecting PLASTUB. PLASTUB undertakes to implement the greatest diligence possible to respect these lead times.
Overrun of delivery lead times shall not give rise to compensation, withheld payment nor cancellation of active orders. In particular, it is specified that delays due to weather conditions shall not give rise to compensation. Moreover, PLASTUB shall not be held liable for delays caused by subcontractors imposed by the customer nor the late delivery of products or services by the customer.
Any changes to the order shall give rise to corresponding changes in lead times.
The following are considered to be force majeure events discharging PLASTUB from its obligation to deliver: war, riots, fire, strikes, accidents, impossibility to obtain delivery itself, accidents involving tools, machine breakage, transport interruption or delays.
PLASTUB shall inform the customer of any delays in as timely a manner as possible.
In all events, delivery within the deadline can only occur if the customer is up-to-date with its obligations towards PLASTUB.

Article 5 – Transport
Unless an order value is below the minimum defined in the price proposal, products are sold carriage paid. For order values below this minimum, products are dispatched collect or carriage forward and billable.
PLASTUB shall organise transport and assume the costs.
Consequently, products are shipped at the risk and peril of the customer.
Our prices are based on normal courier transport rates. If a more expensive shipment method is used at the customer's request (Express courier, parcel delivery service), the additional cost is fully borne by the customer.
In the event of loss or damage, the customer shall address all actions to the shipping provider as per the conditions of article L.133-6 of the French commercial code.
All complaints for damage or partial loss must be made by extrajudicial measures or by registered post to the shipment provider within three days, excluding bank holidays.
Where necessary, the customer must indicate any reservations on the delivery note signed by the delivery driver and keep a copy. Visible damage must be photographed in the presence of the delivery driver.
Any claims concerning the non-delivery of products must be submitted within eight (8) days of the date of invoice.
For deliveries outside of France, sales are completed Ex Works (latest version drawn up by the International Chamber of Commerce - ICC), unless a different Incoterm is selected on the acknowledgement of receipt of the order.

Article 6 – Product reception & acceptance
On reception of the products, the customer shall verify that all products delivered are compliant with those ordered and the absence of visible defects.
Where necessary, the customer must indicate any reservations on the delivery note signed by the delivery driver and keep a copy.
It is incumbent on the customer to provide justification of the effective nature of the defects or anomalies observed. The customer shall allow PLASTUB full freedom to observe these defects and deliver a suitable remedy. The customer shall refrain from undertaking such actions or from delegating a third party to do so.
All claims shall indicate the numbers of the purchase order, of the delivery notes, of the parts (spool or drum number) and of batches, and be supported by samples of the defective products.
If no complaints or reservations are made by the customer to this end within right (8) days of receiving the products, said products are considered to be accepted.
If a specific technical acceptance procedure is applicable, the procedure shall be subject to special conditions and acceptance shall be issued in the form of a written report signed by all parties.
The cost of work resulting from reservations accepted by PLASTUB shall be borne by PLASTUB.
The customer shall perform product tests and verifications required for its intended use of the products.
Information contained in technical data sheets is given for product use in normal conditions as specified in these documents. Consequently, it is important for the customer to perform prior tests to ensure the product is able to fulfil the intended functions.
PLASTUB shall accept no product returns without prior authorisation.

Article 7 – Price

7.1 – Price
Unless express terms are defined specific to the order, the product prices are those specified in the price proposal.
The validity period of firm price proposals is one month, unless other provisions are defined in the price proposal.
The prices indicated on quotations exclude taxes (VAT) and include the costs of packaging and packing unless otherwise specified in the quotations.
Discounted prices applicable to pre-determined quantities may not be applied to a lesser quantity. In the event a lower quantity is ordered, the price will be revised.

7.2 – Terms of payment - currency
Our invoices are payable in AMBERT. If payment is made by banker's draft, it must be returned to us within eight (8) days as specified by the Code of Commerce.
Unless other conditions are expressly indicated in the specific terms and conditions of the order, payment is due 30 after the date of invoice, net and without reduction.
In no event may payments due to PLASTUB be suspended nor subject to reduction or compensation without the written agreement of PLASTUB.
All payments made to PLASTUB are applied to sums due whatever the origin, starting with the oldest payables.
Unless otherwise indicated in the price proposal, the applicable currency is the Euro.
Non-payment of an invoice shall entitle PLASTUB to demand payment prior to any future shipments of products, whatever the terms and conditions of the purchase order in question.
Early payment shall give rise to a 1% discount per full month early.

7.3 – Advance payment
PLASTUB may required an advance payment from the time of receipt of the acknowledgement of receipt of the purchase order and the proforma invoice. The amount of the advance payment will be between 10% and 30% depending on the nature of the products sold or services to be delivered.

7.4 – Late payment penalties
In the event of late payment, a 5% penalty shall be applied to the pre-tax invoice amount for each month late, while this rate may not be less than three times the legal interest rate. A flat rate indemnity of 40 Euro shall also be applied for recovery costs. The creditor may demand supplementary compensation if the actual recovery costs exceed 40 Euro.

Article 8 – Safety stock
Requests for safety stocks will only become valid after signature of a letter of agreement between PLASTUB and the customer to maintain a safety stock.
Letters of agreement concerning safety stocks are valid for a period of one (1) year. The parties agree to meet two (2) months prior to the end of the validity period to sign a new letter of agreement on safety stocks.
When the customer requires that PLASTUB provides safety stocks, the customer also agrees to purchase the whole remaining stock at the end of the agreement period.
If the safety stock is delivered, PLASTUB shall replace the stock within the deadlines specified in the letter of agreement for safety stock, unless otherwise expressed in writing by the customer on the date of request to deliver the safety stock.
The customer shall be obliged to purchase the replaced safety stock.
The composition of the safety stock shall be defined jointly by the Parties, two (2) months prior to the end of validity of the letter of agreement.

Article 9 – Confidentiality
The customer shall consider as strictly confidential, all information, technical formulae or concept given or which come into its possession under this agreement. In terms of the application of this clause, the customer is also fully responsible for its employees. Nonetheless, the customer shall not be held liable for disclosure if the elements disclosed are in the public domain or if the customer had prior knowledge of such elements or obtained them from third parties via legitimate means.
Similarly, PLASTUB agrees to maintain the confidentiality of information it obtains in the course of this agreement and to refrain from disclosure to any other party, either during performance of the agreement or following its termination.

Article 10 – Industrial property
All equipment, models, brands, drawings, specifications, assembly instructions, user manuals and other information provided by PLASTUB remain its property at all times.
The customer shall not claim any ownership of equipment, models, drawings, specification and other elements of information. In no event shall the customer use such elements outside the context of the sale agreement.
The customer shall not reproduce or recreate PLASTUB products.
The totality of industrial property rights concerning the results of the execution of the order shall remain the property of PLASTUB, without limit on time nor geographical scope.

Article 11 – Retention of title
The products are sold under retention of title: transfer of ownership is subject to the full payment of the price by the customer on the agreed due date and notwithstanding the transfer of risk on the date of delivery.
If payment is not made by the due date, PLASTUB shall retake possession of the products remaining in its ownership and at its discretion terminate the agreement by registered letter to the customer.
The customer shall not transform, incorporate or assemble any of the products before paying for them in full.

The customer shall retain the sold products under retention of title to ensue that they are not mixed with similar products originating from other suppliers.
The risks are assumed by the customer from the time of delivery of the products, under the conditions of the agreement and notwithstanding the retention of title.
The customer agrees to insure the products to the benefit of entitled parties against all risks they may encounter or be exposed to from the time of delivery.
The customer shall maintain equipment sold under retention of title in good condition and shall assume all reconditioning costs should the equipment be returned unpaid for.
Should a customer fail to pay for purchased products, PLASTUB shall demand their return at the customers expense, risk and peril, by registered letter with recorded delivery.
In the event that PLASTUB reclaims the merchandise, it is not obliged to return any advance payments on the price if these amounts can be cancelled out by the compensation due by the customer (for reconditioning costs or repairs).

Article 12 – Liability – Guarantee - Insurance
The liability of PLASTUB is limited to the repair or standard exchange of products acknowledged as defective, on the condition that they have not been modified, excluding all other indemnities concerning the cost of assembly and machining, delayed supplies etc.
Specific products manufactured according to customer drawings or specifications are not returnable nor exchanged.
Design examples and recommendations are provided for information only. They shall not engage the liability of PLASTUB and shall not constitute an element of performance.
PLASTUB shall not guarantee the harmful consequences of errors in installation, assembly, poor storage or incorrect use. PLASTUB shall not guarantee any damage arising from abnormal use or use not corresponding to the instructions provided in the specifications.
When parts are produced according to customer specifications, the customer is responsible for the information provided and for the suitability of the product with its requirements. PLASTUB declines all liability if the specific products ordered by the customer do not correspond to its needs. PLASTUB shall not be held liable for the design of specific products.
It is the responsibility of the client to inspect the products and ensure their compliance with industry best practices and specific conditions of use. PLASTUB shall accept no product returns without prior authorisation.
PLASTUB delivers its services with all reasonably possible diligence.
PLASTUB shall not be held liable for any indirect harm caused to the customer such as loss of earnings or loss of business.
PLASTUB is insured in accordance with common law.

Article 13 – Drums
Drum deposits are invoiced at the same time as products delivered, at a set price specified in the price proposal. Subject to the deduction of a fixed fee, the deposits are refunded if the empty drums are returned carriage paid in good condition, within a maximum of three (3) months. After this deadline, PLASTUB may apply a rental fee of 2.5% of the drum price per month.

Article 14 – Tools and samples
For the creation of tools and any design work not followed by serial production as foreseen in the initial price proposal, the customer may be obliged to pay for the work completed by PLASTUB involving design costs, supplementary tool costs, finalisation and delivery of prototypes.
For parts subject to regular deliveries and to take account of procurement lead times for functional components of tools under the responsibility of PLASTUB, the customer shall inform PLASTUB of the discontinuation of procurement with two (2) months notice. Otherwise, the customer will assume the cost of reimbursing all expenses incurred.
Tools financed by the customer shall remain the property of the customer, who must retrieve them where necessary at its own cost, risk and peril.

Article 15 – Lengths and tolerances
Lengths invoiced are the lengths actually delivered. When the products originate from specific manufacturing requirements, they may differ from the quantities ordered by 10%, without this entitling the customer to make a claim.
The lengths indicated for our own production include a tolerance of +/- 1%.

Article 16 – Termination
Termination is subject to a period of two (2) months notice from the date of receipt of the registered letter informing the other party of the termination. Prior to termination, the customer shall settle all outstanding invoices concerning tools and inform PLASTUB of the destiny of the tools (taken back at its costs or destroyed by PLASTUB).

Article 17 – Competent jurisdictions
Any disputes concerning the interpretation and execution of product sales shall be the sole jurisdiction of the commercial court of Clermont-Ferrand. PLASTUB's legal domicile is its company head office. French law is applicable.

Article 18 – Returns
When PLASTUB accepts product returns, we may only issue a credit note if they are delivered in perfect condition without sign of use, and after inspection and acceptance by our staff.

Article 19 – Language
For courtesy reasons, our general terms and conditions of sale are available in English but only the French version is legally binding.
